INSPECTED BY

1. GENERAL

A. (To be answered by the Owner or Owner's representative)

Have there been any changes in the occupancy classification, machinery, or operations since the last inspection?

Have there been any changes or repairs to the fire protection systems since the last inspection?

If a fire has occurred since the last inspection, have all damaged sprinkler system components been replaced?

Has the piping in all systems been checked for obstructive materials?

Date last checked (checking is recommended at least every 5 years)

Have all pumps been tested to their full capacity through the use of hose streams or flow meters within the past 12 months?

Are gravity, surface, or pressure tanks protected from freezing?

Are any of the sprinklers installed due for testing or replacement?

YES

N/A

NO

B. (To be answered by the inspector)

Have the sprinkler systems been extended to all visible areas of the building?

Does it appear all areas protected by a wet system are above 40 degrees Fahrenheit?

Are all visible exterior openings protected against the entrance of cold air?

YES

N/A

NO

2. CONTROL VALVES

a. Are sprinkler system main control valves and all other valves in the appropriate open or closed position?

YES

N/A

NO

Control Valves	No. of Valves	Type	Easily Accessible		Signs		Valves Open		Secured? If yes, how?			Supervision Operational

Water Testing Results Made During This Inspection

Test Pipe Located	Size Test Pipe	Static	Residual	Static Pressure After

4. TANKS, PUMPS, FIRE DEPT. CONNECTIONS

a. Are gravity, surface, and tanks at the proper water levels?

b. Are fire department connections in satisfactory condition, coupling free, caps or plugs in place and check valves tight?

c. Are fire department connections visible and accessible?

5. WET SYSTEMS / ANTIFREEZE

a. No. of systems Make & Model

b. Are there antifreeze systems at this facility? Yes No

c. Date antifreeze systems were tested

d. The antifreeze tests indicate protection to: system 1 2 3 4 5 temperature

e. Did alarm valves, waterflow alarm indicators, pressure switches, and retards test satisfactorily?

REPORT OF INSPECTION 2 OF 2

6. DRY SYSTEMS

a. Number of systems Make & Model

Date of last trip test Date of last full flow

b. Were low points drained during this inspection?

c. Did all quick opening devices operate satisfactorily?

d. Did all the dry valves operate satisfactorily during this inspection?

e. Is the dry valve area heated?

YES

NO

N/A

7. PRE-ACTION / DELUGE

a. Number of systems Make & Model

Isolation valve / hose connection above riser?

YES

N/A

NO

--	--	--

8. ALARMS

a. Did the alarms operate during testing?

b. Confirmed all signals received by central station?

YES

N/A

NO

9. SPRINKLERS - PIPING

a. Do sprinklers generally appear to be in good external condition?

b. Is there a spare headbox and extra sprinklers on the premises?

YES

N/A

NO
